Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-9 and 12-18, drawn to a composition comprising a mixture of epoxy resins and an aromatic amine, classified in class 525, subclass 526.
- II. Claims 10 and 11, drawn to the composition of Invention I further comprising a maleinized polybutadiene, classified in class 525, subclass 65.
- III. Claim 19, drawn to a coated substrate, classified in class 428, subclass 413.
- IV. Claims 20-22, drawn to a method of coating a substrate, classified in class 427, subclass 386.

The inventions are distinct, each from the other because:

Inventions I and (II or III) are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product (MPEP § 806.04(b), 3rd paragraph), and the species are patentably distinct (MPEP § 806.04(h)). In the instant case, the intermediate product is deemed to be useful as an adhesive formulation and the inventions are deemed patentably distinct since there is nothing on this record to show them to be obvious variants.

Inventions II and III are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product (MPEP § 806.04(b), 3rd paragraph), and the species are patentably distinct (MPEP § 806.04(h)). In the instant case, the intermediate product is deemed to be useful as an adhesive formulation and the inventions are deemed patentably distinct since there is nothing on this record to show them to be obvious variants.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions anticipated by the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Inventions (I or II) and IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product as claimed can be used in a materially different process of using that product such as a method of bonding two substrates.

Art Unit: 1712

Inventions IV and III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the process as claimed can be used to make another and materially different product such as a substrate coated with a blend of a carboxy-functional polyester and a hydroxy-terminated polyurethane.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species of the claimed invention:

Contingent upon the election of Invention I or II:

- 1) The compositions with and without the amorphous silica of claim 8.
- 2) The compositions with and without the filler of claim 12, wherein if its presence is elected, a particular species thereof is identified from claim 12.
- 3) The compositions with and without the solvent, wherein if its presence is elected, a particular species thereof is selected from claim 17 or 18.
- 4) Contingent upon the election of <u>Invention III or IV</u>, items 1) to 3) hereinabove and the election of a particular substrate from claim 20.

Art Unit: 1712

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species within each of the appropriate items 1) to 4) hereinabove for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-22 are generic.

A reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Upon the cancellation of claims to non-elected inventions, the inventorship must

be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named

inventors is no longer an inventor of at least one claim remaining in the application.

Any amendment of inventorship must be accompanied by a request under

37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

A telephone call was made to Todd E. Garabedian on September 29, 2003 to

request an oral election to the above restriction and election of species requirements,

but did not result in elections being made. The reply to this requirement to be complete

must include an election of the invention and species to be examined even though the

requirement be traversed (37 CFR 1.143).
